PCS Desktop Telephones

SpliceCom

Defining next-generation communication

Business Telephony To Meet Every Need

From affordable entry-level phones to IP terminals that unify advanced telephony and IT applications at the desktop, in SpliceCom's comprehensive PCS telephony family you'll find the product that's the ideal match for your specific business requirement - whatever it may be.

Introducing PCS 560 & PCS 570

Designed to complement other market leading and stylish IT equipment on your desktop, SpliceCom's PCS 560 & PCS 570 IP Phones combine looks, intelligence and desirability in equal measure. The world's slimmest desktop IP phones provide easy access to the benefits delivered by **max**imiser, SpliceCom's range of innovative and award-winning Unified Communications platforms.

Designed to complement other market leading and stylish IT equipment on your desktop...

Ultra sleek in styling, SpliceCom's PCS 560 & PCS 570 IP Phones have been designed to look great from any angle – including the back. Utilising a totally sealed enclosure with not a screw in sight, SpliceCom have focused on delivering the same ease-of-use associated with mobile phones to business telephony users. A large full colour graphics display, nine or eighteen intuitive multi-functional context sensitive keys, and bold instantly recognisable icons combine to deliver the ultimate user experience. A Gigabit Ethernet variant of the PCS 570 is also available – the PCS 570G.

PCS 560 & PCS 570, The Perfect IP Phones For...

.....just about everyone and for every role. SpliceCom's PCS 560 & PCS 570 will save time and improve the performance of any business phone user.

The wide range of productivity enhancing applications and services available through the PCS 560 & PCS 570 are all accessed via nine or eighteen intuitive multi-functional context sensitive keys grouped around the large full colour graphics display.

The stylish design of the PCS 560 & 570 looks good in any setting and from any angle

voicemail, improving business
collaboration

Mobility
change your availability
to suit the circumstance.
Always be available if you
want to be

Personal Settings
easy to change settings to
make the phone work the
way you want to work

PCS 580G Touch Screen IP Phone

For those seeking the real benefits that can be gained from the convergence of voice, video, IP TV and web IT enabled applications, SpliceCom has designed a true 21st Century business telephony solution - the PCS 580G. Offering the intuitive use and operation expected from today's mobile phones, the PCS 580G has been developed with today's business requirements in mind. Built around a large, full colour, touch screen, graphics display, the built-in web browser of the PCS 580G allows relevant information from your core business applications to be "pushed" to the desktop in a timely and controlled manner.

The unique PCS 580G provides touch screen access to dedicated, easy to use, icon driven, telephone system features and much, much more including; Web, Intranet, IP TV, IP Video/Web Cam and web-enabled content delivery. In common with the PCS 570G, the PCS 580G offers an integrated, two-port, desktop 1000/100/10 Mbps LAN switch with Quality of Service (QoS) allowing it to be run 'in serial' with Gigabit Ethernet PCs, so negating the need for a dedicated LAN socket.

Unified Directory – find contact numbers quickly

Dial Pad – make telephone calls

Favourites & Call Parking – quick visibility of colleagues' phone status and one touch contactability wherever they are

Web Browser – pushes content from the world wide web, company intranet, IP TV, IP Video/Web Cams or any web enabled application to the desktop

Personal Settings – easy to change settings to make the phone work the way you want to work

Call History & Messages – know who called when you were away and save time returning the call
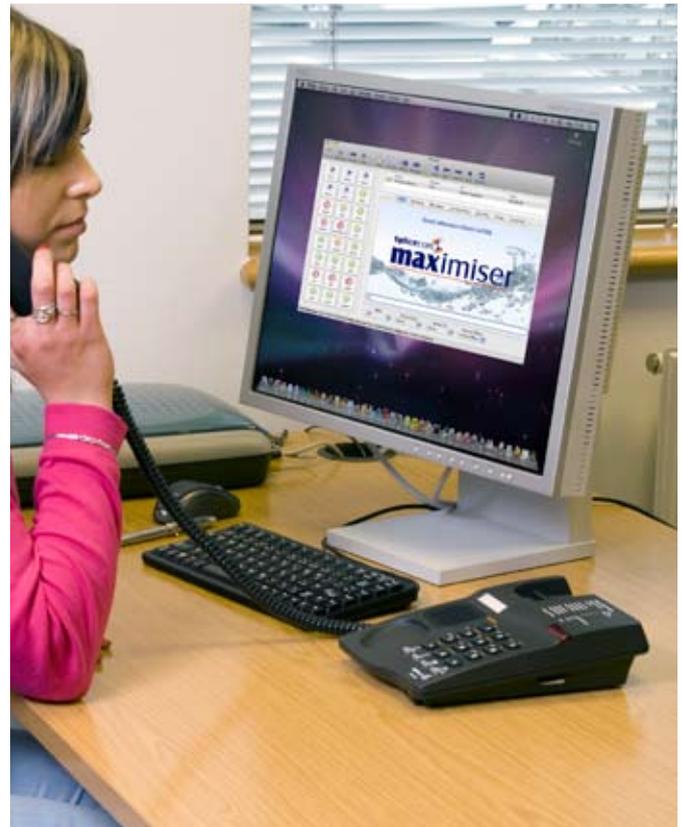

PCS 60 Phone Partner & IP Softphone

Supplied as standard for every **max**imiser user, the PCS 60 Phone Partner application for Windows and Mac OS X computers can be used in conjunction with any SpliceCom PCS phone or existing 3rd party analogue handset to deliver ALL of the benefits associated with SpliceCom's top of the range IP Phones. Calls can be dialed as normal from the phone's keypad, or alternatively via your computer.

Floating Caller Display text shows you who's calling, without interrupting any PC based application or task you're working on. You can also choose if PCS 60 will "pop" on incoming call or when you answer the call, making it conform with the way you want to work.

Access to presence/speed dials/busy lamp field, system directories, messaging, visual call pick-up and call progress are all provided through PCS 60. Even the "push" of web enabled information to the user desktop from the world wide web, company Intranet, IP Video Servers and Web Cams and other web-enabled applications is easily achieved.

With the appropriate Licence, PCS 60's flexibility allows it to be used as an IP Softphone or Operators Console. And there's a Phone Partner for Linux PCs too – PCS 50.

PCS 520 Display Phone

SpliceCom have developed PCS 520 to deliver cost effective display phone functionality for those looking for a hard working business telephone, but who don't need the extended functionality delivered by PCS 560, PCS 570 and PCS 580.

Extremely easy to use thanks to its clear display, internal directory and ten pre-programmed keys for the most commonly used business telephony functions, the PCS 520 also supports desktop paging and intercom. A dual purpose LED indicator identifies when the PCS 520 is in Do Not Disturb mode or when a new voicemail has been received, whilst integrated navigation keys assist with voicemail playback and management. The PCS 520's three-line display shows the caller's number & name (if known) along with status information for Message Waiting, Do Not Disturb & Paging.

The stylish design of the PCS 520, combined with its reliability and versatility, make it the ideal choice for those companies looking for a cost-effective business phone to complement the enhanced features and facilities delivered by SpliceCom's range of IP phones. Offering hands free desktop operation and an integral headset port, the PCS 520 is the answer to the large number of companies who require an attractively priced well-featured business telephone. Unusually for a display/handsfree phone the PCS 520 is entirely line powered.

PCS 505 Entry-Level Phone

SpliceCom's PCS 505 meets entry-level business telephony needs by providing the optimum balance between quality, features and price. The smart yet rugged design means that the PCS 505 not only looks good, but also stays that way, even in tough working environments.

Integrated **max**imiser voicemail management keys, system feature access guide, combined Message Waiting/Visual Call indicator and four dedicated feature keys all help to make SpliceCom's PCS 505 simple to use. Like the PCS 520 Display Phone, the PCS 505 Desktop Phone is designed to be directly connected to SpliceCom's 5100 & 5108 Call Servers and 5315 & 5330 Phone Modules over structured cabling systems or existing telephony wiring. In addition to often being deployed as a wall-mounted phone, the PCS 505 is perfect for those who want a simple cost effective desktop phone to use with **max**imiser.

About SpliceCom

SpliceCom are the only British company to design, develop and manufacturer Unified Communications systems that deliver tangible businesses benefits for all types of company, irrespective of size. Founded by an experienced management team who provided the driving force behind the two most successful UK voice and data convergence companies of the last decade, our **max**imiser product family combines the delivery of voice, video, IP TV and web enabled IT applications at the desktop within a single, scalable system. Since **max**imiser's launch in 2003 we've focused our resources on continuously enhancing our Pure IP Telephone system to meet our customers' needs. This has allowed us to grow our marketshare of Pure IP PBXs in the UK to an impressive 16%, according to respected industry analysts MZA.

SpliceCom cares about our planet. **max**imiser based Unified Communications solutions help companies to reduce their carbon footprint by enabling daily communications, conferencing and collaboration without the need for travel. All SpliceCom products comply with the directive for the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and the regulations for the disposal and recycling of waste electrical and electronic equipment (WEEE).
