

SpliceCom's PCS 505 Desktop Phone

For many businesses the traditional business telephone still has a significant role to play and is likely to for many years to come - support for this type of phone in addition to IP handsets is one of **maximiser's** many strengths. Developed for SpliceCom to meet the traditional telephony needs expected of **maximiser** system phones, the PCS 505 provides cost effective, business quality, desktop telephony.

Featuring integrated maximiser voicemail management keys, system feature access guide and a combined Message Waiting/Visual Call indicator, SpliceCom's PCS 505 is extremely easy to use, thanks to its four dedicated feature keys. The PCS 505 Desktop Phone is designed to be directly connected to SpliceCom's 5100 & 5108 Call Servers and 5315 & 5330 Phone Modules over structured cabling systems or existing telephony cabling.*

The PCS 505 can be further energised by "partnering" with SpliceCom's PCS 60 and PCS 50 Personal Productivity applications for Windows, Mac OS X and Linux PCS, enabling access to advanced telephony features and providing convergence with web-enabled applications.

In every organisation there will be areas of the business where all the enhanced and extended facilities provided by SpliceCom's range of IP Phones simply aren't required and won't be used. There will always be employees who simply want to make, receive and transfer phones calls. As such, the PCS 505 is the answer to the large number of companies who require a simple, cost effective, yet well featured desktop phone to use with **maximiser**.

About SpliceCom

SpliceCom are the only British company to design, develop and manufacturer Unified Communications systems that deliver tangible businesses benefits for all types of company, irrespective of size. Founded by an experienced management team who provided the driving force behind the two most successful UK voice and data convergence companies of the last decade, our **maximiser** product family combines the delivery of voice, video, IP TV and web enabled IT applications at the desktop within a single, scalable system. Since **maximiser's** launch in 2003 we've focused our resources on continuously enhancing our Pure IP Telephone system to meet our customers' needs. This has allowed us to grow our marketshare of Pure IP PBXs in the UK to an impressive 16%, according to respected industry analysts MZA.

SpliceCom cares about our planet. **maximiser** based Unified Communications solutions help companies to reduce their carbon footprint by enabling daily communications, conferencing and collaboration without the need for travel. The PCS 505 complies with the directive for the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and the regulations for the disposal and recycling of waste electrical and electronic equipment (WEEE), as do all of SpliceCom's products.
